ONE NORTH
朗壹廣場

朗壹廣場是北部都會區首座以身心健康為發展重點的地標式甲級寫字樓及商場綜合項目。我們與低碳本地遊環境教育組織「V'air 香港」聯乘，創作出一份單車旅遊指南。為一眾家庭、朋友及單車愛好者，推介一些鄰近地區的自然生態及文化景點，以提高市民對生物多樣性及綠色生活的關注。

One North is the new mixed-use Grade A office and retail destination in the Northern Metropolis that puts people's health and wellness first. In collaboration with V'air Hong Kong — an environmental education organisation specialised in eco-tourism and climate change education, we created this cycling map to raise the awareness on biodiversity and sustainable living, through introducing valuable ecological and cultural attractions in the neighbourhood for families, friends and cycling lovers.

單車代步 × 低碳生活 Cycling × Low carbon living

私家車輛每行駛十公里所排放的二氧化碳可達1.87公升，使用單車取代車輛可減少對空氣所帶來的污染。

Private vehicles can emit up to 1.87 liters of carbon dioxide per 10 kilometers, replacing private vehicles with bicycles can significantly reduce air pollution.

成年人踏單車30分鐘所消耗的熱量可達150千卡，以單車代步可鍛鍊身體耐力，實踐健康生活。

Adults can consume up to 150 kcal by cycling for 30 minutes, which is a good exercise for improving physical endurance and practising a healthy lifestyle.

單車代步比使用車輛產生的噪音污染較少，從而降低對周遭環境的生物及生態所帶來的滋擾。

Switching out cars for bicycles can reduce noise pollution, and thus lowering the disturbance to wildlife.

朗壹廣場 × 低碳生活 One North × Low carbon living

01 香港濕地公園
Hong Kong Wetland Park

濕地公園原是生態緩解區，以彌償興建天水圍新市鎮發展而失去的濕地，現為集自然護理、教育及旅遊用途於一身的景點。公園分為訪客中心和濕地保護區兩大部份。訪客中心展現濕地的功能與各類物種，並提供不同有趣的活動，如短片欣賞和手作工作坊，讓訪客寓學習於遊戲。

濕地保護區包括淡水沼澤、蘆葦床、泥灘、紅樹林和林地等生境，為許多生物提供理想的棲息和繁殖地。訪客可以走至保護區邊緣，在棧道上欣賞濕地景色，探索生物與生態系統的互動。週末及假日均提供導賞服務，須提早預約。

The Hong Kong Wetland Park was originally planned as an ecological mitigation area to compensate for the wetlands lost due to the Tin Shui Wai New Town development. It has now become a conservation, education and tourism facility. There are two main zones, namely the visitor centre and the conservation area. The visitor centre showcases the functions and different species of wetlands. Interactive activities such as DIY workshops and film-watching are also provided to allow visitors learning through play.

The conservation area serves as an important habitat and breeding ground for wildlife. It includes freshwater marshes, reed marshes, mudflats, mangroves and woodland. Visitors can stroll along the edges of the conservation area and observe how nature works. Guided tours can be booked on weekends and public holidays.

03 南生圍
Nam Sang Wai

南生圍由錦田河及山貝河包圍，擁有魚塘、蘆葦叢和紅樹林等生境，景致優美，被喻為「香港後花園」。遊人可沿南生圍河流導賞徑步行或騎單車。依兩河而行，沿途有多個魚塘，這一帶在三、四十年代已經有基圍和魚塘運作。

兩河交界的紅樹林和泥灘，可見招潮蟹、彈塗魚和水鳥的蹤影，冬天時更有機會看見不少候鳥，如全球瀕危的黑臉琵鷺。紅樹林不止孕育豐富的濕地生態，更能加固河岸。蘆葦叢旁有兩排高大的校樹，一直延伸至著名的婚紗橋，是熱門拍攝地點。

Nam Sang Wai is surrounded by the Kam Tin River and Sham Pui River, consisting of fishponds, reed beds and mangroves. The stunning view has earned its title as the “Paradise of Hong Kong”. Visitors may walk or cycle along the Nam Sang Wai River Education Trail. There are many fishponds scattered along both sides of the river. The fishpond and gei wai culture in the region started in the 1930s to 1940s.

At the intersection of the two rivers, you may find fiddler crabs, mudskippers and water birds on the intertidal mudflats and mangroves. There are lots of migratory birds during winter, including the endangered Black-faced Spoonbill. Rows of tall River Red Gum trees are planted next to the reed beds. The bridal bridge at the end of the trail draws a lot of photographers.

02 山貝河
Shan Pui River

山貝河在元朗工業村以東，當年因發現小灣鱷「貝貝」而聲名大噪。河邊的一小段有一排畢直的白千層，樹皮層次分明，夏秋之際更會長滿白色像刷子的小花，騎著單車賞河畔風景，非常寫意。六十年代間，政府為解決元朗一帶水浸問題，於流經元朗新市鎮的河流展開渠道化工程，擴闊、挖深和拉直河道，並在河床及河岸鋪上混凝土，成了廣為人熟悉的元朗明渠。為提高河道的生態價值，政府於九十年代在山貝河下游開展河道治理工程，引入環保設計，例如保留天然河床及種植紅樹，為野生動物提供棲息地。

Shan Pui River is located to the East of the Yuen Long Industrial Estate. It became famous when a saltwater crocodile “Pui Pui” was spotted there. Along the river, there is a row of Paperbark Trees with sheets of bark peeling off in multiple layers. Brush-like white flowers grow on the trees during Summer and Autumn, making it an enjoyable riverside bike ride.

In the 1960s, the section going through the Yuen Long New Town underwent massive channelisation to alleviate flooding. The river was widened, deepened, straightened and the riverbed and banks were protected with concrete. The channelised section is known as the Yuen Long Nullah. Environmentally friendly designs were implemented at the lower course in the 1990s to enhance the ecological value of the river. The natural riverbed was retained and mangroves were planted to provide habitats for wildlife.

04 元朗公園
Yuen Long Park

公園坐落於水牛嶺一片天然林地上，設計盡量保留了原有地形和樹木。特設自然保育園地，種植了開花和結果的本地樹種，並少用化學劑，以吸引野生雀鳥、蝴蝶和蜻蜓。園內有一個小瀑布，經溪澗蜿蜒流入人工湖。依小橋流水漫步，讓人心曠神怡。這裡廣闊的大草坪，綠意盎然，在稠密摩肩接踵的元朗市提供一片喘息天地。

公園另一個特色景點是樓高七層的紅色百鳥塔，其底層是個開放式鳥舍，在模擬叢林的環境中飼養過百隻雀鳥。登上三十米高的塔頂，可俯瞰元朗及天水圍全景。

Located on a natural woodland in Shui Ngau Leng, the design of the park preserves the original natural landscape. There is a conservation corner with native flowering and fruit-bearing trees as well as less use of chemicals to attract wild birds, butterflies and dragonflies. A waterfall connected to a stream which ends at the ornamental lake and forms a pleasant and relaxing path along the stream. The spacious lawn at the park offers a respite from the crowded Yuen Long Town Centre.

The 7-storey Aviary Pagoda in red is a highlight of the park. The open aviary at the bottom of the pagoda has housed more than a hundred birds in a man-made woodland environment. At the top level of the pagoda, visitors can enjoy a panoramic view of Yuen Long and Tin Shui Wai.

05 屏山文物徑
Ping Shan Heritage Trail

屏山位於元朗平原，以前有大片農田和魚塘。自1980年代，政府發展天水圍新市鎮後，將附近的魚塘填平及填高，成為天水圍新市鎮，屏山自此成為低窪內陸地區。

鄧氏早在北宋年間定居元朗，目前屏山最古老的建築物是有近八百年歷史的鄧氏宗祠。屏山文物徑貫通坑頭村、坑尾村和圍村上璋圍。村內現代與傳統氛圍交織，瓦頂灰磚的古建築被高大的住宅圍繞。文物徑包括在明朝建成的古塔聚星樓，多幢由鄧族所建的傳統建築，以及由舊屏山警署改建而成的屏山鄧族文物館暨文物徑訪客中心。

Ping Shan is located at Yuen Long plain with many farmlands and fishponds in the past. Since the Tin Shui Wai New Town development, fishponds were filled and raised. Ping Shan has thus become low-lying inland.

The Tang clan has been settled in Yuen Long since Northern Song Dynasty. Their Tang Ancestral Hall was the oldest building here, with nearly 800 years of history. The Ping Shan Heritage Trail goes through Hang Mei Tsuen, Hang Tau Tsuen and Sheung Cheung Wai. The traditional architecture is surrounded by the towering skyscrapers, creating a unique atmosphere. The Trail links up a number of traditional buildings built by the Tang, the ancient Tsui Sing Lau Pagoda built in the Ming Dynasty and the Ping Shan Tang Clan Gallery cum Heritage Trail Visitors Centre which is housed in the Old Ping Shan Police Station.

07 沙橋村
Sha Kiu Tsuen

沙橋村是昔日養蠔業重鎮，沿岸南至下白泥村一帶的養蠔歷史可追溯至北宋時期。海灣位於鹹淡水交界，因水鹽度適中及浮游生物豐富，十分適合養蠔。村內的陳祥記是碩果僅存的蠔戶，世世代代以養蠔為生。沙橋村遠離煩囂，份外寧靜，走到岸邊可環瞰后海灣，傍晚時落霞景致迷人。

蠔是濾食性動物，能改善海水水質。蠔礁也是其他海洋生物重要的棲息及繁殖地，其堅硬的結構亦有助保護海岸免受極端天氣破壞，因此具重要的保育價值。

The region between Sha Kiu Tsuen and Ha Pak Nai Village was home to traditional oyster farming since the Song dynasty. The brackish water of the bay has the optimum salinity and rich microscopic planktons for the growth of oysters. The Chan family is the only member of Sha Kiu Tsuen who is still running the oyster farming business. Far from the bustling city, the tranquility of the village and the stunning sunset is definitely worth a visit.

Oysters are not only filter feeders which improve seawater quality, oyster reefs are also important habitats and nursery grounds for many marine organisms. Their strong structure provides additional coastal protection against extreme weather conditions. Therefore, they are considered to have important conservation value.

06 大生圍
Tai Sang Wai

大生圍的魚塘，屬米埔內后海灣拉姆薩爾濕地範圍。相鄰的魚塘形成大片濕地，供雀鳥和其他野生生物棲息。魚塘一般於秋冬季會進行排水和曬塘，候鳥在這段時間便會趁機覓食，塘底的小魚及無脊椎動物就成為鳥群的盛宴。不少可愛的水鳥會在此出沒，如池鷺、大白鷺、黑翅長腳鷸等。此外，這大片魚塘還可以在暴雨時發揮蓄水緩洪的作用。

大生圍魚塘旁種了不少果樹，如大樹菠蘿、黃皮、桑樹等。簡樸的單層村屋配上水天一色的塘景，令人不自覺放慢腳步，細味風景。

The fishponds in Tai Sang Wai belong to the Mai Po Inner Deep Bay Ramsar Site. The clusters of fishponds form large wetlands for birds and other wildlife. When the fishponds are drained for harvesting and cleaning during autumn and winter, small fishes and invertebrates that remain become a banquet for the migratory birds. You may find adorable water birds foraging here, such as Chinese Pond Herons, Great Egrets and Black-winged Stilts. Also, the large fishponds can store stormwater and mitigate floods.

Ample of fruit trees are planted next to the fishponds, such as jackfruit, Chinese Wampi and mulberry. The single-storey village houses with the fishponds as the background form a delightful scenery that naturally slows you down to enjoy the moment.

08 下白泥
Ha Pak Nai

下白泥位於流浮山西面的濕地上，背靠連綿山巒，前臨深圳灣。白泥長達六公里的小徑，是遠足和騎單車的好地方。夕陽西下之際，海灣波光粼粼，泥灘一望無垠，紅樹林綿延不斷，絕對是香港最美的日落之一。

除了日落景致醉人，泥灘的生物多樣性豐富，為野生動物提供棲息地和食物，其中包括罕有的馬蹄蟹。馬蹄蟹又稱鱚，早於四億多年前已存在，故有「活化石」之稱。但由於過度捕撈，以及城市發展和海洋污染破壞其居所，導致牠們的數量不斷下降。

Ha Pak Nai is located on the wetland to the west of Lau Fau Shan. Flanked by mountains on one side and Deep Bay on the other, this area is known for its spectacular sunset and the 6km coastal trail. With its long stretch of mangroves, mudflats and calm waters, it is a popular spot for hiking and cycling.

Apart from the captivating scenery, the mudflats are rich in biodiversity. They provide habitats for a diverse variety of wildlife, including the endangered horseshoe crabs. Horseshoe crabs have existed for more than 400 million years, winning the nickname “living fossils”. Due to overfishing and habitat loss from urban development and marine pollution, there is a drastic decrease in their population.
